Money and Exchange-New York, March 16.—Money on call easy at 114(6)2 per cent; closed offered at 114 Prime mercantile paper, 4@6 per

Sterling exchange quiet, steady; \$4 85% for sixty-day bills; \$4 87% for demand.

Stocks and Bonds.

New York, March 16.—Operators, including even room traders, to-day were awaiting events especially as regards the sugar combination and the action of the Pennsylvania authorities in the matter of the coal combination. The street was included to play the probability of the bill in chined to play the probability of the bill in the New Jersey legislature securing the signature of the governor against the possibility that the Pennsylvania may be able to find some flaw in the agreement. Reading displayed a strong temper throughout most of the session, while real-

izations on late advances and execution stop orders made sugar weak. A spurt in prices was caused by the execution of some buying orders in Atchison for speculative account, but the general list during the greater por-tion of the day remained without feature of any kind and duliness and stagnation ruled.

Railroad bonds quiet. Government bonds dull and steady. State bonds entirely neglected.

Cotton Cloth Trade.

Manchester, March 16.—The Guardian in its commercial article says business is largely suspended in consequence of a further reduction in the price of cotton at Liverpool, buyers preferring to await developments. The unsettled state of the market is due to increasing receipts of cotton at American ports and high crop estimates. Inquiries for the East are small at lower rates, some demand for printing at lower rates, some demand for printing cloths, but they are easy. There is fair miscellaneous inquiry for small parcels. Sales, moderate. Sales of export yarns,

Feeling in Wheat and it Closes Ther-Corn Higher-Oats

Strong-Sugar Higher.

Gradstreet's reports the exports of wheat and flour from both coasts for the last week at 3,754,000 bushels, against 2,908,898 bushels the revious week and 2,621,000 bushels for the corresponding week last year. For thirty-seven weeks the aggregate was 153, 652,000 bushels, against 70,037,000 bushels for the corresponding time last year, and 70,099,891 bushels for the same time in 1889-90.

Eighty thousand ounces of silver were shipped to Europe last Saturday. Total gold exported from February 19 to date is \$5,530,000, including \$849,348 shipped

last week.

The latest from St. Petersburg is that the outlook for winter wheat is very un-The world's shipments of wheat to Eu-

rope last week were 7,200,000 bushels, against 5,700,000 bushels the preceding According to the Chicago statement the visible supply of wheat last week decreased 750,000 bushels; corn increased 1,252,000 bushels; oats increased 106,000 bushels.

produce exchange that the governors will severely deal with any one guilty of dealing hereafter in put and call transactions. An old rule prohibiting this is to ba, they say, strictly enforced. The board of directors of the Chicago board of trade has taken aimitar action.

Chapp & Co., cof New York, in their weekly review say exports of grain for the sax months ending March I have only been exceeded twice for the same time; in 1879, 1890, 1889 and 1890. Indications point to ex-ports from the 1891 crop to equal 160,000,000 bushels. Cribbers report but little corn in store along the various lines of railroads in the corn belt. All reports agree that farmers are rejuctant sellers, and generally believe they will get higher prices by hold-ing on, and would not sell now even if the roads were such that they could deliver grain to the stations. The extra number of livestock reported in the country is likely to cause extra large consumption. There is a large short interest as well as a large con-

centrated long interest. During February the wheat supplies to Europe and afoat decreased 9,500,000 bushels—800,000 bushels affoat, 1,700,000 bushels in United Kingdom, 4,000,000 in France, 200,000,000 in bushels in Belgium, Germany and Holland, and 1,500,000 in Russia. The stocks of flour in the United States and Canada increased about 37,000 barrels. The stocks at the larger points in the United States are stated by the stocks at the larger points in the United States increased about 37,000 barrels. the United States increased about 92,000 barrels and in Canada about \$2,000 barrels, while the interior points in the United States show a reduction of 51,000 barrels. The reduction in the supplies of wheat in the United States and Canada was about \$6,516,000 bushels. The aggregate reduction in the supplies of wheat in the supplies of wheat in the supplies of wheat in the supplies of the in the supply of flour and wheat was equal to about 6,353,000 bushels. The decrease in the stocks in Europe and America during Debugary was equal to about 15,353,000

The Cotton Crop.

Referring to its estimate of the cotton crop in December last and the trade and newspaper comment upon it, Bradstreet's in its latest issue says:

The situation to-day, so far as statistics of the current crop compared with those of preceding yields afford an indication, favors or what larger yield than Brudstreet's respondents reported three months ago.

If an inference be drawn from the foregoing (table of crop movement) that the smallest of above proportions of the crop is to come into sight between March I and September I, say only 7 per cent as contrasted with nearly 8 per cent in 1886-90, with 9½ per cent in 1888-89, with 10½ per cent in 1867-88 and with 14 per cent in 1890-91, then, as shown by the foregoing tabular exhibit, 7.914.000 bales of cotton which came into sight between September 1, 1891, and March 1, 1892 would represent 95 per cent of the present crop, pointing to a yield slightly in excess of 8,500,000 bales of cotton last year. Of course, should the proportion of the crop to come forward prior to September 1 be as large as 10 per cent, the crop would prove to be nearly 8,800,000 bales.

Thus far this cotton year weekly receipts from plantations have run largely ahead of

Thus far this cotton year weekly receipts from plantations have run largely ahead of like totals a year ago, but many good judges have been and still are confidently predicting a heavy drop in receipts. Consideration in this connection should be given to the extent to which this year's commercial crop has been swelled by the indefinite but unquestionably large quantity of last season's crop carried over on September 1, 1891. The foregoing suggestions may cnable anyone to calculate to his own satisfaction the probable outcome.

CI A 20, ILL, March 16.—There was fair demaid o wheat to day, but offerings were less urge... ad a much botter feeling pervaded the market. This is partly due to a natural reaction from the cx eme captession which has ruled for some a ys. The one factor I: the micket's there application erop damage records from Michigan. Onto Indiana, Missouri and Kanaw. Come as they did from various sections op rators s em to place some reliance in them and sought quite freely.

Bradstreet's reported decrease of 1000,00 bushels cast of, and a decrease of 491,00 bushels west of the Rocky Mountains. Export dearan-

west of the Rocky Mountains. Export clearan-were again large. Near the close there were better advices from abroad and short selwere batter avices from account and account of the profits, there was a rally and the market closed firm.

Corn was quiet and firm during the fore noon influenced almost entirely by sympathy with firmness in wheat and other speculative products. During the last hour, however, the market turned weak when wheat broke and lost the advance. A TO BE STATE OF THE STATE OF T
